Economic Overview

International

U.S. Equities enjoyed a strong quarter, bond prices increased modestly: During the third quarter of 2020, the S&P 500 rose by 8.5%, achieving an all-time high on September 2nd, the Dow Jones Index increased by 7.63%, and the Stoxx 600 increased by 0.2%. However, market sentiment was risk-off late in the quarter due to a combination of a resurgence in European Covid-19 cases, questions over additional fiscal stimulus measures and great political uncertainty regarding the outcome of the U.S. election. High yield bonds outperformed investment grade bonds in the third quarter as the Bloomberg Barclays Investment Grade Corporate bond index increased by 1.54% and the Bloomberg Barclays High Yield Bond Index increased by 4.02%. In addition, U.S. treasuries rose marginally as the yield on the 10-year note decreased by 2 basis points.

The US economy's gradual recovery continued, and the Federal Reserve's (Fed) remained accommodative. The Fed implemented average inflation targeting (AIT) which seeks to achieve an average inflation rate over a specific period of time. This means that the Fed would be willing to let inflation run above its current 2% target for some time. The U.S. unemployment rate declined by 0.5% to 7.9% in September, and the number of unemployed persons fell by 1.0 million to 12.6 million. Both measures have declined for five consecutive months but remain elevated over February levels. The €750 billion of bond purchases promised by the ECB president improved sentiment toward the region. Eurozone annual inflation was negative at -0.2% in August compared to 0.4% in July.

Oil prices doubled in the second quarter of 2020 after bottoming out in April, this was partly due to sharp oil supply cuts by OPEC. However, there was only a small increase in prices in the third quarter as they remain

over 30% below pre-covid levels. This resulted in an increase of 2.4% for WTI (closed at US\$40.22) and an increase of 2.5% in Brent prices in the third quarter ended September 2020.

Local

The JMD/USD exchange rate closed the September 2020 quarter at J\$142.10 / US\$1, which represents a depreciation of 1.5% since June 2020. The borders and hotels reopened in the third quarter; however, tourism inflows are still well below pre-covid levels. The JSE Index declined by 0.9% over the third quarter in contrast to the single digit increases recorded by the S&P 500 and the Stoxx 600.

COVID 19 IMPACT

SIL's investment continues to reap success for its shareholders, despite the challenges being faced by other companies during this time.

- **SIL increased the dividend payout ratio by 60% to shareholders in the third quarter:** The company increased the dividend payout ratio from 50% to 80%. SIL is providing US dollar liquidity to its shareholders at the height of the pandemic. The company pays dividends twice a year in hard currency as a result of its holdings of US dollar denominated assets.
- **30.8% Year on Year Rise in Net Interest income:** SIL's net interest income increased by 30.8% year on year due to a combination of lower interest expense and continued growth in the size of the portfolio. SIL is generating more income post COVID19 than it was before. Investors will continue to benefit from the US dollar income SIL's portfolio generates through dividend payments.
- **SIL well-positioned to benefit from Global economic recovery:** It is evident that the developed countries will lead the global economic recovery. Jamaica's economic recovery is likely to lag the recovery in discretionary consumer spending in the US, Europe and China. SIL's exposure to the

developed countries suggests that it will be among the first companies on the local stock exchange to benefit from a global economic recovery.

Enhanced diligence amid COVID 19: As the fallout from the Covid-19 pandemic continues, SIL continues to perform enhanced due diligence as it monitors the credits held by the portfolio and hunts for undervalued securities to enhance shareholder value. .

Financial Overview

Increase of 30.80% in net interest income	J\$80.59m vs. J\$61.61m September 2019
Foreign exchange gains increase of 24.84%	J\$80.28m vs. J\$64.31m September 2019
Total assets increase of 7.10%	J\$1.70b vs. J\$1.59b June 2019
Leveraged weighted average yield on portfolio	9.58%
Dividend yield as September 30, 2020	2.84%
Earnings per share	J\$0.25

Income Statement

Total revenue for the first nine months of 2020 was J\$170.31 million, 20.84% higher compared to J\$140.94 million for the same period in 2019. This was driven by higher interest income and unrealised FX gains. Net Interest income totalled J\$80.59 million for the nine months ended September 2020; 30.8% higher than the \$61.61 million recorded for the corresponding period in 2019. The net interest margin increased to 90.74%. The net interest margin continues to improve as interest rates remain low.

Net income decreased by 5.81% from J\$100.21 million for the nine months ended September 30, 2019 to J\$94.39 million for the nine months ended September 30, 2020. The decrease in net income was primarily due to an

increase in unrealised held for trading revaluation losses \$21.65 million, compared to a gain of J\$8.79 million for the same period in 2019. Other operating expenses for the nine-month period ended September 30, 2020 totalled J\$27.94 million or 3.23% lower than the J\$28.87 million of other operating expenses recorded for the corresponding period in 2019.

The Jamaican dollar depreciated against the US dollar by J\$9.54 or 7.19% for the nine-month period ended September 30, 2020, relative to the same period in 2019 when it depreciated by J\$7.44 or 5.83%. This led to an increase in unrealised foreign exchange gains for the nine months ended September 30, 2020 of J\$80.28 million compared to J\$64.31 million for the corresponding period in 2019.

Balance Sheet

Total equity decreased by 0.29% from J\$1.22 billion as at September 2019 to J\$1.21 billion as at September 2020. This is due to a reduction in the fair value reserve due to a brief market sell-off in global markets that occurred at the end of September.

Total assets increased by 7.1% from J\$1.59 billion as at September 2019 to J\$1.70 billion as at September 30, 2020. As at September 30, 2020, margin loans totalled J\$450.67 million and represented 27.02% of the total portfolio of investment securities compared to 21.26% for September 2019. The weighted average yield is enhanced by the use of leverage and has resulted in a yield of 9.58% on the US dollar denominated fixed income portion of the portfolio.

Sterling Investments Limited

Notes to Financial Statements

1. Identification

Sterling Investments Limited ("the Company") was incorporated on August 21, 2012 in St. Lucia under the International Business Companies Act and commenced operations on December 1, 2012. The Company's registered office is located at 20 Micoud Street, Castries, St. Lucia. The principal activities of the Company are holding and trading of tradable and other securities and other investments.

2. Basis of preparation

These interim financial statements have been prepared in accordance with IAS 34 Interim Financial Reporting and should be read in conjunction with the Company's last annual financial statements as at and for the year ended December 31, 2019 ('last annual financial statements'). They do not include all of the information required for a complete set of IFRS financial statements. However, selected explanatory notes are included to explain events and transactions that are significant to an understanding of the changes in the company's financial position and performance since the last annual financial statements.

These interim financial statements are presented in Jamaican dollars, which is the Company's functional currency.

3. Use of judgements and estimates

In preparing these interim financial statements, management has made judgements and estimates that affect the application of accounting policies and the reported amounts of assets and liabilities, income and expense. Actual results may differ from these estimates.

The significant judgements made by management in applying the Company's accounting policies and the key sources of estimation uncertainty were the same as those described in the last annual financial statements.

4. Significant accounting policies

The accounting policies applied in these interim financial statements are the same as those applied in the Company's financial statements as at and for the year ended December 31, 2019 which was prepared in accordance with International Financial Reporting Standards (IFRS).
